Abstract

Smart homes are increasing these days. People have smartphones with them all the time. In this project Arduino UNO plays a key role by processing the data. The proposed of this project is control the any home electrical appliances with one click or voice command using smart phones. Command are sent via Bluetooth Technology to Arduino UNO. So you can’t need to get up and Turn OFF/ON switches you can directly ON/OFF any home appliances by clicking one button on smartphones.

Purpose

The main purpose of this project is control the any home appliances with smart phones.

Advantages

- Low Cost
- Safety
- Saves Time
- Save Money

Disadvantages

- Limited Range
- Complex To Coding

Developing Technology & Software/Tools Use

HARDWARE

- Arduino UNO

- Bluetooth Module

- 4-CHANNEL RELAY CONTROLLER FOR I2C

Continue….

SOFTWARE

- MIT App Inventor
